

ANDREW NAGY

Backend Developer | Full Stack (Angular)

Email: andrewnagy.2222@gmail.com | Phone: +201114133786

LinkedIn: linkedin.com/in/andrew-nagy-5639b018b | GitHub: github.com/Andrewnagy

PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience in ASP.NET Core, C#, and SQL Server, specializing in building scalable RESTful APIs and secure enterprise systems. Proven expertise in Clean Architecture, JWT Authentication, and database performance optimization. Recently expanded into Full Stack development with Angular, including freelance Angular development, to deliver end-to-end applications.

TECHNICAL SKILLS

Backend: ASP.NET Core, Entity Framework Core, C#, Web APIs, LINQ.

Frontend: Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap.

Databases: SQL Server, T-SQL, Database Design, Query Optimization.

Security & APIs: JWT, ASP.NET Identity, RESTful API Design, OAuth2.

Tools & Cloud: Git, GitHub, AWS S3, CI/CD Basics, Postman.

PROFESSIONAL EXPERIENCE

Freelance | Angular Developer March 2026 – Present

- Working as a freelance Angular developer, building and maintaining responsive front-end applications for clients.
- Developed reusable Angular components and services to speed up delivery across multiple client projects.
- Integrated Angular front-ends with RESTful APIs, handling authentication, state management, and data-driven UI.
- Managed client requirements, timelines, and deliverables independently as a freelance contractor.

Zentix | Backend Developer March 2024 – December 2025

- Architected and maintained scalable RESTful APIs using ASP.NET Core and Clean Architecture principles to ensure modularity and high performance.
- Implemented secure Authentication & Authorization protocols using JWT and ASP.NET Identity for granular access control and user security.
- Optimized SQL Server performance through advanced indexing and query refinement, reducing data retrieval time for heavy transactional modules.
- Collaborated in an Agile environment using Git/GitHub for version control and participated in peer code reviews to ensure industry-standard code quality.

Zentix | Backend Developer Trainee January 2023 – June 2023

- Completed a 6-month intensive training program focused on professional ASP.NET Core and SQL Server development best practices.
- Developed real-world project simulations, focusing on creating reusable services, implementing Dependency Injection, and designing efficient schemas.

KEY PROJECTS

Ramis – Tax & Accounting Office Website

- Built a website for a tax and accounting office using Angular, delivering a responsive and professional online presence for the firm.
- Developed reusable Angular components to present the office's services, team, and contact information in a clean, organized layout.
- Focused on clean UI/UX and fast load times to give clients an easy way to learn about and reach the firm's tax and accounting services.

Bosla – Online Course Platform

- Designed a scalable backend using ASP.NET Core and integrated AWS S3 for secure cloud storage of educational materials and media.
- Implemented complex API structures for course delivery, user management, and enrollment tracking with high throughput.
- Developed a custom middleware for request logging and exception handling to improve system debugging and monitoring.
- New Point: Built a notification service to alert users of course updates and enrollment status changes using asynchronous processing.

Supplinx – E-commerce System

- Developed a full e-commerce engine with robust features for product inventory, order processing, and secure customer accounts.
- Achieved significant performance gains via SQL optimization, query caching, and efficient database indexing strategies.
- Integrated advanced search and filtering logic using LINQ to provide users with fast and accurate product discovery.
- New Point: Implemented a coupon and discount logic engine that allows dynamic pricing adjustments based on promotional campaigns.

EskanderShop – Inventory Management System

- Built a comprehensive inventory system featuring Role-Based Access Control (RBAC) for secure and controlled data access.
- Engineered a secure backend architecture to handle high-concurrency requests for sensitive stock and business-critical data.
- Developed an automated reporting module that generates real-time analytics on sales trends and low-stock inventory alerts.
- New Point: Designed a data export feature supporting CSV and PDF formats to facilitate seamless offline inventory audits and financial reporting.

CERTIFICATIONS

- SQL (Advanced & Intermediate) – HackerRank
- Entity Framework Core – Udemy
- Java (Level 1 & 2) – Cambridge Certification Authority

EDUCATION

Bachelor of Computer Science | New Cairo Academy 2020 – 2024

ADDITIONAL INFORMATION

Military Service: Completed (2025).

Languages: Arabic (Native), English (Professional Working Proficiency).
